HOSE RELEASE AGENT PEGAW PASTE

Description:

Hose Release Agent PEGAW PASTE is mould release agent developed for production of flexible hoses.Hose Release Agent PEGAW PASTE provides excellent release properties. It is stable up to a temperature of at least 250 °C

Properties:

- Mixture of water-soluble polymers
- gelly, watersoluble mandrel release agent for production of shaped hoses ('lube in tube' principle)
- Biodegradable
- Especially suitable for EPDM and NBR
- A gel at room temperature and liquid above 60° C
- Enables pulse spraying/dosing during extrusion. Upon cooling a uniform stable lubricant film remains inside the uncured hōse

Technical Data:

| | |
|----------------------|--------------------------------|
| Composition | Mixture of different polymeres |
| Appearance | Yellowish Gel |
| Density (gr / cm3) | Approx. 1,3 |
| Viscosity (25°C) | Gel Form |
| Dropping Point | 50°C |

Packaging:

Europe; Asia: 230 kg Drum

Storage:

Hose Relaease Agent PEGAW PASTE should be stored in tightly sealed containers and has to be protected from frost, heat direct sunlight. If these rules are obeyed , the product can be stored for at least 6 months. The expiry date is stated beneath the production date on the labels of each container.

Further Information:

Informations for regulations on safety and transport are provided in the safety detasheet. Product technical information and data is based on the best information available and does not constitute or imply a warranty or patent infringement of any kind. The user is responsible for testing product suitability prior to use in production.
